## The Glory of Ukraine

*Sacred Images from the 11th to the 19th Centuries*

This exhibition from the collection of the oldest monastery in Ukraine, the Kyiv-Pecherskaya Lavra (or Monastery of the Caves) will survey the history of Ukrainian icons and their stylistic evolution over the centuries. Ukrainian icons, unlike their Russian counterparts, incorporated noted influences from western art, particularly during the Renaissance and Baroque periods. The blending of East and West in their iconography and style is unique and needs to be better known in the US. Alongside icons the exhibition will display textiles, ceremonial and altar crosses, chalices and other liturgical objects. MOBIA will be the first venue in the United States.

At MOBIA, the Museum of Biblical Art  
1865 Broadway at 61<sup>st</sup> St.  
New York, NY 10023

## Ukraine-Sweden *at the crossroads of history XVII – XVIII centuries*

The exhibition explores a pivotal period of European history through the prism of the alliance between Sweden, then a preeminent European power, and Ukraine whose Cossack leaders (Hetmans) were striving to establish an independent state.

An era of treaties, shifting alliances and glorious battles whose victories and defeats had lasting consequences, comes to life in the exhibit. Visitors will stand before actual Cossack flags, including the imposing flag of Hetman Ivan Mazepa, admire the armor and other fascinating artifacts and examine original historic documents written by the prominent leaders of the period.
